

INSTALLATION

SI-X Series

SI-X series' angled low profile enclosures are designed for unobtrusive fixed install where sonic accuracy and high SPL are essential. Consistent voicing across the range ensures seamless coverage when using a variety of models in distributed sound applications. A 1" compression driver on a 70 x 70 conical waveguide provides open and detailed high frequency extension with an even and predictable dispersion.

SI-X series includes a range of complimentary subwoofers for extended low frequency performance and increased SPL.

SI-X series are available in black and white, and all models feature multiple M8 rigging points for a variety of flown applications. Brackets are included as standard.
